HCD5MIH

equIP® SERIES 720p TRUE DAY/NIGHT H.264 INDOOR BOX IP CAMERA

From Honeywell's equIP® Series of IP-based products, the HCD5MIH is a high definition, True Day/Night network camera that offers the latest in digital video surveillance. The HCD5MIH provides 720p resolution at full frame rate. The 1/4" CMOS network camera combines world-class imaging and camera technology with the equIP® Series IP networking technology, providing streaming H.264 and MJPEG images with frame rates up to 30 frames per second (25 fps for PAL systems). The HCD5MIH supports the PSIA specification for interoperability between network video products.

The HCD5MIH day/night camera adapts to varying lighting conditions to ensure the highest picture quality even in extreme low-light conditions. When the light level drops too low for accurate video identification in color, the camera moves the IR cut filter out of the optical path and then switches to black and white mode to capture more detail using the CMOS sensor's increased sensitivity to IR light.

A powerful and intuitive web client allows fine tuning of the camera and auto iris levels. This can also be performed from most DVR/NVR setup utilities.

The HCD5MIH supports dual video streams and multiple compression formats. The compression parameters for the two video streams are independently configurable. The primary stream is dedicated to H.264. The secondary stream can be configured for H.264 or MJPEG. The HCD5MIH features analog video out for aiming and focusing during setup.

The HCD5MIH has built-in Power over Ethernet (IEEE 802.3af), which allows power to be supplied to the camera using standard network cabling, eliminating the need for a separate power supply and associated wiring. In situations where PoE support does not exist, the unit can also be powered directly from 24 V AC.

Market Opportunities

The HCD5MIH is a network surveillance solution designed for object recognition that is required in locations where variable and low-light conditions exist. Setup is quick and easy and can be customized through a web client or from an NVR. This provides optimum performance for indoor applications, as well as outdoor applications when using an environmental housing.

Features

- Outstanding image quality, 720p (1280 x 720) resolution
- 30 fps (25 fps PAL) progressive scan
- PSIA support
- Camera tamper detection
- Video motion detection
- Variable day/night threshold setting to accommodate switching to black and white images in low light

- Dual digital video streams, independently configurable, H.264 and/or H.264/MJPEG
- Remote firmware update
- Supports both dynamic and static IP address assignment
- Includes advanced IP locator software to make system setup easy

- Web server for remote setup of camera video and network parameters
- Choice of 24 V AC or PoE IEEE 802.3af power inputs
- Multiple levels of password protected remote access prevents unauthorized users from altering system settings
- Supports bidirectional audio

HCD5MIH

SPECIFICATIONS

Like all cameras in the equIP® series of IP-based products, the HCD5MIH network camera uses Honeywell technology for camera video motion detection, tamper detection, remote firmware updating and for secure storage of all camera settings. Video motion detection recognizes object motion within the field of view; then a simple on-screen notification alerts the user. Camera tamper detection notifies the user when a camera's field of view is altered, blinded or blurred. This ensures the video's integrity and alerts the customer to either a live event or a system problem that is causing disruption to the video stream. Honeywell's technology also allows users to remotely upload firmware to the camera. Setup is quick and easy and can be customized through a web client or from an NVR. The built-in web server provides password protected access to the camera's video and network setup.
